

Bram Peters | Studio

Business Intelligence Specialist | Human-Centred Product Design

MSc Human-Technology Interaction | UX/UI, data & digital products

ABOUT ME

Business Intelligence Specialist at KLM with an MSc in Human-Technology Interaction and a background in UX/UI. I turn complex data into intuitive products, connecting pipelines, user-centred design and complete digital solutions. Through Bram Peters Studio and Lost In Translation, I also build branded apps, websites and creative experiences.

PROFESSIONAL EXPERIENCE

Business Intelligence-Specialist, KLM

Amsterdam Airport Schiphol, Netherlands | Jun 2026 - Present

Delivering full-stack Microsoft Power Platform products for aviation Engineering & Maintenance, combining BI, user-centred design and stakeholder collaboration.

Owner/Founder, Lost In Translation™

Amsterdam, Netherlands | Sep 2025 - Present

Founded and built an AI-powered e-commerce platform for personalised transit-map posters, combining product design, branded storytelling and custom AI travel assistants.

Freelancing, Bram Peters Studio™

Amsterdam, Netherlands | Oct 2025 - Present

Independent design and development of websites, apps, UX/UI, BI and Power Platform solutions, alongside creative video production for businesses and individuals.

Senior BI Advisor & Product Designer, UWV SMZ

Amsterdam, Netherlands | Jul 2025 - May 2026

Led BI products for Social-Medical Affairs: ETL pipelines, SQL/SSIS/SSAS, Oracle, external data integration and advanced DAX/Power BI reporting.

Data Analyst & BI Specialist, UWV SMZ

Amsterdam, Netherlands | Aug 2024 - Jul 2025

Built and optimised data pipelines and analytics dashboards; translated business needs into models and integrated multiple agency data sources.

Data/BI Specialist, SerenIT

Amsterdam, Netherlands | Jan 2024 - Aug 2024

Delivered dashboards and reporting for public and private clients; led KPI workshops and developed DAX measures and SQL queries.

Master Thesis Project - TU/e Security Office

Eindhoven, Netherlands | Dec 2022 - Oct 2023

Designed and implemented a student dashboard for self-regulated learning, using user research, stakeholder requirements and Power BI prototypes.

Frontend Developer, TU/e

Eindhoven, Netherlands | Sep 2022 - Dec 2022

Built modular React/Vue components integrated with Typo3, SharePoint and educational portals, supporting internal tools across teams.

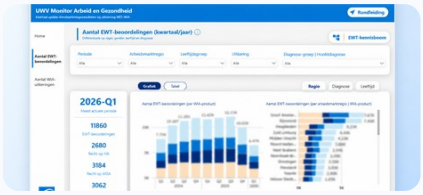

UX Designer & Android Developer, Blue Jay

Eindhoven, Netherlands | Jun 2018 - Jun 2020

Designed a healthcare drone interface and Android app, including UX research, iterative testing, voice recognition and mood-sensitive lighting.

Selected work & capabilities

PORTFOLIO

UWV Monitor Arbeid & Gezondheid

Made socio-medical data understandable through public insight into WIA assessments, diagnoses, outcomes and regional trends.

View project

Lost In Translation™

Built an AI-powered map-poster platform with custom travel assistants, personalised literal translations and brand-focused e-commerce.

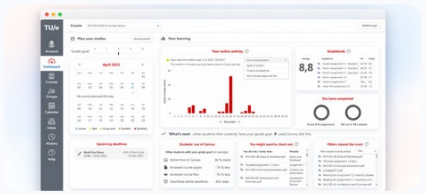

View project

LELIBRAMBAS+ | Family Archive Streaming

Designed a private family-video streaming platform for TV, desktop and mobile, spanning UX/UI, cloud data, APIs and media delivery.

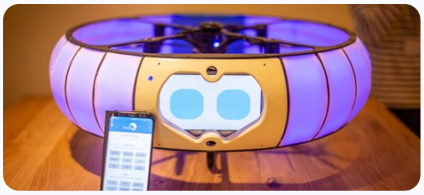

View project

TU/e Learning Dashboard

Mapped student journeys, set up ETL processes and designed academic-performance visualisations to support self-regulated learning.

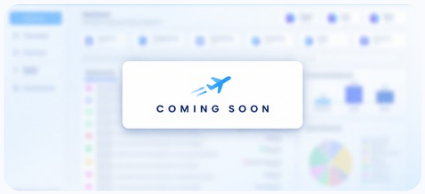

View project

The 'Emotional' Drone

Co-designed a healthcare drone interface and Android app, combining user research, voice recognition and mood-sensitive lighting.

View project

KLM - Beyond Low Code

Developing a full-stack M365 Power Platform solution for KLM Engineering & Maintenance, co-designed with stakeholders across the organisation.

Coming soon - view overview

SKILLS

Business Intelligence

Advanced

PowerBI/DAX, PowerApps|Automate, Stakeholder-management, policy-driven KPI-reporting, data-driven decision-making, Cloud ETL, data quality & lineage, GDPR-compliancy, performance tuning, paginated reports

Data Analytics

Expert

R, Stata, Python, (statistical) data mining/engineering/analytics, scientific research methods, machine learning

UX/UI & Interaction Design

Advanced

Figma, Adobe XD, wireframing, prototyping, usability, flows, cognitive walkthroughs, design systems, IA, user research, stakeholder interviews, Double Diamond, self-regulated learning theory, storytelling, A/B testing, Behavioral research methods, human cognition & perception, human-robot interaction, persuasive & ethical design.

App Development

Proficient

Android, Kotlin, Apple tvOS, iOS, Power Apps

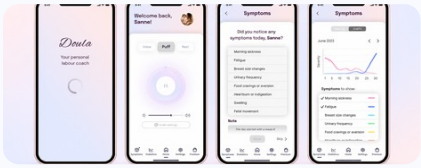

MS Power Platform

Proficient

M365 Copilot Ecosystems using Power Apps, Power Automate, Power BI, SharePoint, full-stack low-code application development, Microsoft-native integrations, enterprise workflow automation, data modelling & integration, SharePoint Lists & data management, custom connectors, responsive UX/UI design, role-based access control, permissions & governance, approval workflows, cross-platform integration, scalable enterprise applications.

Selected work & capabilities

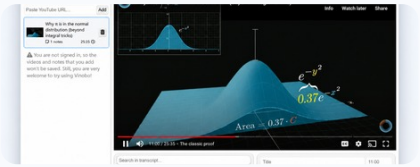

PORTFOLIO CONTINUED

Doula | UX/UI Case Study

Redesigned a pregnancy and contraction tracker in a 10-hour UX/UI case study, using research and usability findings to guide the experience.

View project

Vinobo

Built a video-learning tool with searchable YouTube transcripts, timestamped annotations and personal notebooks saved to user accounts.

View project

Reimagining Spotify Podcasts

Applied the Double Diamond framework at KTH to research listener goals and redesign the Spotify podcast experience.

View project

Raspberries Shopping Assistant

Co-designed Rodebjer's digital in-store shopping assistant, giving customers greater control over fitting rooms, service and their visit.

View project

The Honeymoon Webshop

Built a personalised wedding-gift webshop for honeymoon activities and stays, with guest messages collected in a keepsake collage.

Contact me

J. Meijer B.V. 40 Jaar

Created "A Day in the Life of Luca Orvini", a playful company-anniversary film, exploring concept development, directing and post-production.

View project

My Next Project

Looking for new challenges that combine design and development. Let's connect and make something that makes sense.
