ABOUT ME

Graduated *MSc Human-Technology Interaction* and Senior Data-/BI-Advisor at the Dutch Employee Insurance Agency (UWV), I specialize in creating intuitive, data-driven solutions with organizational and societal impact. From stakeholder research and conceptual design to prototyping and technical implementation—including ETL pipelines and backend infrastructure—I take ownership across all project phases from concept to release. I thrive in Agile (Scrum, SAFe) interdisciplinary teams committed to consistently delivering exceptional, user-friendly digital products. **Let's collaborate and build something unique together!**

” Bram

PROFESSIONAL EXPERIENCE

- **Senior BI Advisor & Product Designer, UWV SMZ – Amsterdam, Netherlands (Jul 2025 – Present)**
Leading development of business intelligence data products within the Division of Social-Medical Affairs. Responsible for ETL pipelines (SQL, SSIS/SSAS, Oracle), integrating external data sources, and advanced DAX modeling. Designed Power BI dashboards tailored to government services in accordance with Dutch social security legislation.
- **Data Analyst & BI Specialist, UWV SMZ – Amsterdam, Netherlands (Aug 2024 – Jul 2025)**
Built and optimized data pipelines and analytics dashboards. Transformed business requirements into data models and managed integration between multiple agency data sources and internal BI tools for a range of stakeholders.

EDUCATION

- **MSc Human-Technology Interaction**
TU/e – Eindhoven, Netherlands
- **Erasmus MSc Computer Science**
KTH – Stockholm, Sweden
- **BSc Psychology & Technology**
TU/e – Eindhoven, Netherlands

LANGUAGES

- **Dutch**
Native

- **Data/BI Specialist, SerenIT – Amsterdam, Netherlands** (Jan 2024 – Aug 2024)
Delivered custom dashboards and reporting tools to public and private clients. Led stakeholder workshops, defined KPIs, built DAX measures and SQL-based backend queries for data-driven insights.
- **Master Thesis Project – TU/e Security Office – Eindhoven, Netherlands** (Dec 2022 – Oct 2023)
Designed and implemented a student dashboard to support self-regulated learning. Conducted user research, defined requirements with university security officers, iterated wireframes, and implemented the tool using Power BI and UX methodologies.
- **Frontend Developer, TU/e – Eindhoven, Netherlands** (Sep 2022 – Dec 2022)
Built modular front-end components (React/Vue) integrated with Typo3, SharePoint, and educational portals. Supported cross-team development on internal tools.
- **UX Designer & Android Developer, Blue Jay – Eindhoven, Netherlands** (Jun 2018 – Jun 2020)
Designed a healthcare-oriented drone interface and mobile app. Played a full role in UX research, iterative testing and final app delivery, including voice recognition features and mood-sensitive lighting. Worked in an Agile team using Scrum.

CERTIFICATES

- **Python for Data Science & Engineering –**
IBM (2025)
- **UX Design –**
Google (2025)
- **Advanced BI Developer –**
Computrain (2024)
- **Advanced SQL Programmer –**
Computrain (2024)

PORTFOLIO HIGHLIGHTS

- **UWV Monitor Arbeid & Gezondheid**
Interactive public tool providing insights into UWV's execution of social welfare laws across various stakeholder groups via detailed visualisations by region, diagnosis, hot topics and reintegration success.
- **TU/e Student Dashboard**
A Canvas-integrated dashboard that fosters self-regulated learning at TU/e and is validated via

SKILLS

- **BI & Data Analytics | Expert**
Power BI, DAX, SQL, Oracle, Azure, SSIS/SSAS, ETL, data mining & modeling, advanced analytics
- **UX/UI & Interaction Design | Advanced**
Figma, Adobe XD, wireframing, prototyping, usability testing, user flows, cognitive walkthroughs, design systems
- **Frontend Development | Proficient**
HTML, CSS, JavaScript, TypeScript, React, Vue.js, Kotlin (Android), REST API integration

scientific A/B-testing in the context of the MSc thesis.

- **Blue Jay – The ‘Emotional’ Drone**

Designed and developed a healthcare drone with intuitive interfaces including dynamic lighting and expressive LCD “eyes.” Also built an Android app for real-time tracking, emergency detection and voice control.

- **Vinobo**

A tool enabling students to watch lectures, annotate timestamped notes, and search transcripts instantly for key topics; built with React, Next.js and Firebase for seamless integration and secure account storage.

- **Lost In Translation**

Exciting project launching soon! Visit my portfolio for updates.

- **Cognitive & Behavioral Insight | [Advanced](#)**

Behavioral research methods, human cognition & perception, human-robot interaction, persuasive & ethical design

- **Research & Methodology | [Expert](#)**

User research, stakeholder interviews, Double Diamond, self-regulated learning theory, storytelling, A/B testing

- **Tools & Platforms | [Proficient](#)**

SharePoint, Typo3, Git, Microsoft Azure, Power Automate, JIRA, Confluence, Databricks

- **Agile & Scrum Delivery | [Intermediate](#)**

Sprint planning, backlog refinement, iterative development, stakeholder management, cross-functional teamwork, demos & presentations, user stories
