ABOUT ME

🔥 Hi, I'm Bram! I am a *Sr. Data-/BI-Specialist* currently working at UWV with a MSc background in *Human-Technology Interaction* engineering. I turn raw data into intuitive user-focused products that drive real organizational and societal impact. From ideation to constructing ETL pipelines, and developing front-end solutions, the projects that thrill me the most are those where I got to keep my stakeholders in the loop using UCD-methods and deliver *real/impactful* products to them. I thrive in agile teams and take pride in every project I do, so **let's collaborate and create something powerful together!**

” Bram

PROFESSIONAL EXPERIENCE

- 🏢 **Owner/Founder, Lost In Translation™ | Amsterdam, Netherlands** (Sep 2025 - Present)
Fully crafted, designed and implemented a design-driven e-commerce platform 'disguised' as a travel agency webshop. Powered by personalized-AI, engaging UX, brand-focused storytelling and backed-up by cutting-edge innovation. Maps so wrong, they feel just right. Visit lostintranslation.nl for more info!
- 🏢 **Senior BI Advisor & Product Designer, UWV SMZ – Amsterdam, Netherlands** (Jul 2025 – Present)
Leading development of business intelligence data products within the Division of Social-Medical Affairs. Responsible for ETL pipelines (SQL, SSIS/SSAS, Oracle), integrating external data sources, and advanced DAX modeling. Designed Power BI dashboards tailored to government services in accordance with Dutch social security legislation.
- 🏢 **Data Analyst & BI Specialist, UWV SMZ – Amsterdam, Netherlands** (Aug 2024 – Jul 2025)
Built and optimized data pipelines and analytics dashboards. Transformed business requirements into data models and managed integration between multiple agency data sources and internal BI tools for a range of stakeholders.
- 🏢 **Data/BI Specialist, SerenIT – Amsterdam, Netherlands** (Jan 2024 – Aug 2024)
Delivered custom dashboards and reporting tools to public and private clients. Led stakeholder workshops, defined KPIs, built DAX measures and SQL-based backend queries for data-driven insights.
- 🎓 **Master Thesis Project – TU/e Security Office – Eindhoven, Netherlands** (Dec 2022 – Oct 2023)
Designed and implemented a student dashboard to support self-regulated learning. Conducted user research, defined requirements with university security officers, iterated wireframes, and implemented the tool using Power BI and UX methodologies.
- 🎓 **Frontend Developer, TU/e – Eindhoven, Netherlands** (Sep 2022 – Dec 2022)
Built modular front-end components (React/Vue) integrated with Typo3, SharePoint, and educational portals. Supported cross-team development on internal tools.
- 🚀 **UX Designer & Android Developer, Blue Jay – Eindhoven, Netherlands** (Jun 2018 – Jun 2020)
Designed a healthcare-oriented drone interface and mobile app. Played a full role in UX research, iterative testing and final app delivery, including voice recognition features and mood-sensitive lighting. Worked in an Agile team using Scrum.

EDUCATION

- 🎓 **MSc Human-Technology Interaction**
TU/e – Eindhoven, Netherlands
- 🎓 **Erasmus MSc Computer Science**
KTH – Stockholm, Sweden
- 🎓 **Erasmus MSc Interactive Media Technology**
KTH – Stockholm, Sweden
- 🎓 **BSc Psychology & Technology**
TU/e – Eindhoven, Netherlands

CERTIFICATES

- 📜 **Data Storytelling with PowerBI & Python –**
Edureka (2025)
- 📜 **Python For Data Science & Engineering –**
IBM (2025)
- 📜 **UX Design –**
Google (2025)
- 📜 **Advanced BI Developer –**
Computrain (2024)
- 📜 **Advanced SQL Programmer –**
Computrain (2024)

PORTFOLIO HIGHLIGHTS

- 🌐 **Lost In Translation™ | Global Transit, Local Nonsense™**
I created a design-driven travel agency webshop for custom-tailored, gloriously inaccurate and personality-driven metro- and city maps. Powered by personalized-AI, an engaging UX with brand-focused storytelling at its foundation, backed-up by cutting-edge innovation. By whom? One of our questionably qualified AI-travel assistants. Are they professional? No. Entertaining? Absolutely. Keep an eye out on lostintranslation.nl!
- 📊 **TU/e Student Dashboard**
I designed and validated a Canvas-integrated student dashboard that supports self-regulated learning. The project was tested through scientific A/B-studies in the Human-Technology Interaction context at TU/e.
- 🚁 **Blue Jay – The 'Emotional' Drone**
I co-designed and developed a healthcare drone with intuitive interfaces such as dynamic lighting and expressive LCD 'eyes.' I also built an Android app for real-time tracking, emergency detection, and voice control.
- 👩 **Doula | UX/UI Case Study**
I completed a 10-hour UX/UI case study to redesign an outdated pregnancy app. Through user research and usability testing, I identified pain points and transformed both the visual design and overall user experience.
- 🛒 **Raspberries Shopping Assistant**
I designed a shopping assistant concept that empowers customers to choose when to receive help, reducing stress in crowded retail environments and improving accessibility for introverted shoppers.
- 🎧 **Reimagining Spotify Podcasts**
At KTH, I worked on revamping Spotify's podcast section using the Double Diamond framework. I conducted user research, defined key challenges, and prototyped solutions that improved navigation, community features, and content discovery.

SKILLS

- 🔧 **Business Intelligence | Advanced**
Power BI service & governance, DAX modeling, RLS/OLS, SSIS/SSAS, Azure Data Factory, data quality & lineage, GDPR-compliant reporting, policy-driven KPIs, performance tuning, paginated reports, stakeholder-ready dashboards for agencies
- 🔧 **BI & Data Analytics | Expert**
Power BI, DAX, SQL, Oracle, Azure, SSIS/SSAS, ETL, data mining & modeling, advanced analytics
- 🔧 **UX/UI & Interaction Design | Advanced**
Figma, Adobe XD, wireframing, prototyping, usability testing, user flows, cognitive walkthroughs, design systems
- 🔧 **Frontend Development | Proficient**
HTML, CSS, JavaScript, TypeScript, React, Vue.js, Kotlin (Android), REST API integration
- 🔧 **Cognitive & Behavioral Insight | Advanced**
Behavioral research methods, human cognition & perception, human-robot interaction, persuasive & ethical design
- 🔧 **Research & Methodology | Expert**
User research, stakeholder interviews, Double Diamond, self-regulated learning theory, storytelling, A/B testing
- 🔧 **Tools & Platforms | Proficient**
SharePoint, Typo3, Git, Microsoft Azure, Power Automate, JIRA, Confluence, Databricks
- 🔧 **Agile & Scrum Delivery | Intermediate**
Sprint planning, backlog refinement, iterative development, stakeholder management, cross-functional teamwork, demos & presentations, user stories
- 🔧 **Project Start-Up & Stakeholder Management | Advanced**
Discovery → scoping → kickoff, stakeholder mapping & RACI, requirements elicitation, risk/RAID logs, delivery roadmap & milestones, change management & comms plans, workshop facilitation, exec updates, cross-functional alignment
